

Antwort

der Bundesregierung

auf die Kleine Anfrage der Abgeordneten Sylvia Kotting-Uhl, Hans-Josef Fell, Bärbel Höhn, weiterer Abgeordneter und der Fraktion BÜNDNIS 90/DIE GRÜNEN – Drucksache 17/11730 –

Atomtransporte

Vorbemerkung der Fragesteller

Die Antwort der Bundesregierung auf die Kleine Anfrage „Herkunft und Transporte von Kernbrennstoffen und ihrem Ausgangsmaterial“ ergab, dass es beim Bund digitale Datenbanken zur Erfassung von Transporten von Kernbrennstoffen und ihrem Ausgangsmaterial und Atommüll gibt, die zum Teil bis ins Jahr 1991 zurückreichen, vergleiche die Antworten der Bundesregierung zu den Fragen 7 bis 13 auf Bundestagsdrucksache 17/10573. Laut der Antwort pflegen das Bundesamt für Strahlenschutz (BfS) und – bei grenzüberschreitenden Verbringungen – das Bundesamt für Wirtschaft und Ausfuhrkontrolle (BAFA) entsprechende Datenbanken.

Ein bereits sehr umfassender Teil dieser digital erfassten Transporte wurde von der Bundesregierung bereits in der oben genannten Antwort tabellarisch dargestellt. Ferner gab die Bundesregierung an, dass neben den abgefragten Aspekten weitere Aspekte wie die Transportmittel und die Sicherungskategorie elektronisch erfasst werden.

Diese Kleine Anfrage hat nun zum Ziel, einen möglichst vollständigen öffentlichen Überblick über alle digital erfassten Atomtransporte zu liefern. Dabei werden auch Transporte erneut abgefragt, die bereits Gegenstand der oben genannten Kleinen Anfrage waren – aus Gründen der Übersichtlichkeit und weil nach zusätzlichen Aspekten gefragt wird.

Um den Bearbeitungsaufwand gering zu halten, bezieht sich diese Kleine Anfrage ausschließlich auf die bei den Behörden digital vorhandenen, also leicht abrufbaren Informationen. So zielt sie beim BfS auf die seit 1990 und die seit 1999 beim BAFA elektronisch erfassten Transporte ab; vergleiche die Antwort der Bundesregierung zu Frage 11 auf Bundestagsdrucksache 17/10573.

1. Welche innerdeutschen sowie grenzüberschreitenden genehmigungs- oder anzeigespflichtigen Verbringungen von Kernbrenn- und Ausgangsstoffen und radioaktiven Abfällen/Reststoffen gab es bis dato laut der elektronischen Erfassung seitens des BfS und des BAFA (bitte für jedes Jahr eine tabellarische Übersicht mit transportgenauer Beschreibung aller elektronisch

erfassten Angaben zu Stoff, Menge, Behälter, Absender, genauem Absenderort, Empfänger, genauem Bestimmungsort, Transportdatum, Lieferunternehmen/Antragsteller, Transportmittel, Sicherungskategorie usw. erstellen)?

Die Datenbank des Bundesamtes für Strahlenschutz (BfS) listet die für den Zeitraum 1990 bis Oktober 2012 digital erfassten Kernbrennstofftransporte auf, die durch das BfS genehmigt wurden (siehe Tabelle 1 – Anhang 1*). Die Einstufungen der jeweiligen Sicherungskategorie werden als Verschlussache nicht veröffentlicht.

Die tabellarische Auflistung des Bundesamtes für Wirtschaft und Ausfuhrkontrolle (BAFA) enthält die Ein- und Ausfuhr von Kernbrennstoffen und Ausgangsstoffen für die Jahre 1999 bis einschließlich September 2012 (siehe Tabelle 2 – Anhang 2*).

Grenzüberschreitende Verbringungen radioaktiver Abfälle werden durch das BAFA elektronisch nicht erfasst. Die hierüber manuell erfassten Daten werden der Kommission zur Erstellung des Berichtes gemäß Artikel 20 Absatz 1 der Richtlinie 2006/117/Euratom übermittelt, wo sie dann elektronisch zusammen mit den Daten aller anderen beitragenden Mitgliedstaaten verarbeitet werden. Die jeweils für einen Zeitraum von drei Jahren erstellten Berichte sind nach deren Veröffentlichung durch das Amt für amtliche Veröffentlichungen der Europäischen Gemeinschaften in Luxemburg allgemein zugänglich.

2. Seit wann gibt es beim Eisenbahn-Bundesamt eine elektronische Erfassung der vom Eisenbahn-Bundesamt genehmigten oder ihm zur Kenntnis gelangten Atomtransporte, also der Transporte von Kernbrenn- und Ausgangsstoffen und radioaktiven Abfällen/Reststoffen?

Welche Aspekte werden darin erfasst (bitte um vollständige Angabe)?

Das Eisenbahn-Bundesamt (EBA) erfasst seit Januar 2002 Daten von Beförderungen radioaktiver Stoffe und Kernbrennstoffen elektronisch. Die Daten beinhalten die folgenden Angaben: Versandstück, Absender und Empfänger, Versand- und Empfangsdatum, Versandgut, Genehmigungsgrundlage, Anzahl der Wagen und zusätzliche Bemerkungen (z. B. Leerbehälter, Mosaikbehälter).

3. Welche Atomtransporte gab es laut der elektronischen Erfassung des Eisenbahn-Bundesamtes seit Beginn der Erfassung bis dato (bitte für jedes Jahr eine tabellarische Übersicht mit transportgenauer Beschreibung aller elektronisch erfassten Angaben erstellen)?

Die Aktualisierung der Datenbank des Eisenbahn-Bundesamtes erfolgt mit Stichtag 31. Dezember. Der aktuelle Datensatz ist in der Tabelle 3 (Anhang 3)* aufgeführt.

4. Seit wann gibt es beim Zoll eine elektronische Erfassung der vom Zoll bearbeiteten Transporte von Kernbrenn- und Ausgangsstoffen und radioaktiven Abfällen/Reststoffen (seien es ATLAS oder etwaige Vorgängersysteme; vergleiche die Antwort der Bundesregierung zu Frage 9 auf Bundestagsdrucksache 17/10573)?

Wurden/werden darin auch Aspekte erfasst, die weder vom BfS noch vom BAFA elektronisch erfasst werden (bitte um vollständige Angabe aller As-

* Von einer Drucklegung der Tabelle 1, der Tabelle 2 und der Tabelle 3 wurde abgesehen. Diese sind als Anlage auf Bundestagsdrucksache 17/11926 auf der Internetseite des Deutschen Bundestages abrufbar.

pekte, differenziert danach, ob sie auch von BfS und BAFA oder nur vom Zoll erfasst wurden/werden)?

Seit dem Jahr 2001 erfasst und bearbeitet die Zollverwaltung Zollanmeldungen automatisiert im IT-Abfertigungsverfahren ATLAS.

Wird eine Ware im Normalverfahren zu einem Zollverfahren angemeldet, hat der Zollanmelder eine Vielzahl von Daten in der Zollanmeldung anzugeben. Dazu zählen u. a.:

- Versender/Ausführer, Empfänger, Anmelder, ggf. Vertreter; hierbei jeweils Name/ Firmenbezeichnung gegebenenfalls Firmenkurzbezeichnung, Straße, Hausnummer, Postleitzahl, Ort, Ortsteil, Nationalität, gegebenenfalls die EORI-Nummer;
- Versendungs-/Ausfuhrland, Ursprungsland;
- Bestimmungsland (bei Bestimmungsland Deutschland: Zusätzlich Bestimmungsbundesland);
- Beförderungsmittel;
- Zollverfahren (beispielsweise Überführung in den zollrechtlich freien Verkehr);
- Rechnungspreis;
- Rohmasse/Eigenmasse;
- Warennummer (grundsätzlich: bei der Einfuhr elfstellige Warennummer, bei der Ausfuhr achtstellige Warennummer);
- Warenbezeichnung;
- Packstückart, dazu die Anzahl und gegebenenfalls die Nummer;
- Unterlagen (beispielsweise: Einfuhrgenehmigung nach Atomgesetz).

Im Übrigen wird auf die Antwort zu Frage 1 verwiesen.

5. Existieren beim Zoll unabhängig von der in der Antwort der Bundesregierung zu Frage 9 auf Bundestagsdrucksache 17/10573 genannten Aufbewahrungsfrist noch Datensätze/digitale Informationen zu älteren Atomtransporten, und falls ja, bis in welches Jahr zurückgehend?

Wie bereits in der Antwort der Bundesregierung auf die Kleine Anfrage der Fraktion BÜNDNIS 90/DIE GRÜNEN zu Frage 11 auf Bundestagsdrucksache 17/10573 dargelegt, führt die Zollverwaltung keine Datenbanken im Zusammenhang mit grenzüberschreitenden Verbringungen von Kernbrenn- und Ausgangsstoffen. Insoweit liegen auch keine Daten außerhalb des IT-Abfertigungsverfahrens ATLAS vor.

6. Ist die Antwort der Bundesregierung zu Frage 9 auf Bundestagsdrucksache 17/10573 so zu verstehen, dass die Datensätze mindestens zehn Jahre aufzubewahren sind, darüber hinaus aber auch länger aufbewahrt werden können, oder ist sie so zu verstehen, dass die Datensätze nach zehn Jahren zu löschen sind?

Die Datensätze werden grundsätzlich zehn Jahre beginnend mit Ablauf des Kalenderjahres, in dem die Daten letztmalig bearbeitet wurden, archiviert. Danach werden sie gelöscht. Eine Verlängerung dieser Frist kann in Ausnahmefällen erforderlich sein, um in laufenden Ermittlungsverfahren die Löschung benötigter Daten zu verhindern.

7. Welche innerdeutschen sowie grenzüberschreitenden genehmigungs- oder anzeigepflichtigen Verbringungen von Kernbrenn- und Ausgangsstoffen und radioaktiven Abfällen/Reststoffen gab es bis dato laut der elektronischen Erfassung des Zolls (sofern nicht bereits durch die vorangegangenen Fragen zu BfS, BAFA und Eisenbahn-Bundesamt vollständig abgedeckt; bitte für jedes Jahr eine tabellarische Übersicht mit transportgenauer Beschreibung aller vom Zoll elektronisch erfassten Angaben erstellen)?

Die Daten der Bundesämter BfS, BAFA und EBA sind vollständig und abdeckend. Im Übrigen wird auf die Antwort zu Frage 1 verwiesen.
